Welcome to PowerToolz, Inc.

We're here to help!

Many families feel powerless when they hear that their child is having developmental difficulties.

When provided with the right tools, these families will be able to create a learning atmosphere in their home to allow their child to achieve developmental progress.

We Turn Disabilities Into Possibilities!

PowerToolz is focused on assisting families and other care providers with teaching tools to enhance the individual physical, mental, and social development of children.

We offer comprehensive **therapeutic programs** on an outpatient basis to assist children in reaching their developmental objectives.

We work with you!

Parents help develop functional goals for their children. We then structure our therapy to address these goals.

It starts with a thorough evaluation, followed by a sitdown with parents to map out plans for powerful, effective and efficient treatment. [Learn more.](#)
